My friends highly recommend dumpsreview exam materials for my C4090-454 exams. I used and it is really great. Thanks!!!

Richard

I am quite pleased with your dump. I recommended your C2010-040 test materials to all of my students. Your dump can help them prepare their exam well.

Gary

Really recommend buying this for 1z0-062 exam. I recently passed the exam using dumpsreview exam dumps.

Marico

This is an excellent dump. I used dumpsreview 312-75 exam dump to study for my exam and passed 312-75 exam today. Thank you so much!

Webb

An excellent company provide valid dumps vce & exam review

Exam : **C1000-031**

Title : IBM Power Systems Scale-Up
Technical Sales

Vendor : IBM

Version : DEMO

NO.1 A customer would like to add a second HMC to an environment which consists of multiple POWER8 and POWER9 processor-based systems.

Which of the following is a requirement for both HMCs to be able to manage all the systems?

- A. Both HMCs must be at the same version of HMC Code.
- B. Each HMC must be on a dedicated HMC VLAN.
- C. Both HMCs must be on the same HMC VLAN.
- D. All the POWER8 processor-based systems must be at the same firmware level.

Answer: B

Explanation

A switch can be partitioned to create a VLAN dedicated to HMC to managed server communication. If HMCs are configured as DHCP servers, there must be only one HMC on each VLAN! If dual HMCs are attached for redundancy, it is unwise to connect the HMCs to two VLANs in the same switch, because if the switch fails both HMCs lose connectivity, thereby defeating the HMC redundancy

NO.2 A customer has ordered Capacity on Demand (CoD) for their server, and would like to implement it in their environment.

To use CoD, they download an activation code from the IBM:

- A. CoD website and enter it using the HMC.
- B. Entitled System Support website and enter it using the HMC.
- C. CoD website and enter it into the partition profile.
- D. Entitled System Support website and enter it into the partition profile.

Answer: A

NO.3 A client wants to relocate partitions between servers to avoid application downtime during system maintenance or to automatically balance workloads.

Which offerings provide these capabilities?

- A. PowerHA Enterprise Edition with PowerVM Enterprise Edition
- B. PowerVC Standard Edition with PowerVM Enterprise Edition
- C. PowerHA Enterprise Edition with PowerVC Enterprise Edition
- D. PowerSC Standard Edition with PowerVC Enterprise Edition

Answer: B

NO.4 Which of the following is a feature exclusive to PowerVM Enterprise Edition?

- A. HMC Virtual Appliance
- B. PowerVC
- C. PowerSC
- D. Active Memory Sharing

Answer: D

NO.5 Which of the following is an advantage of Power System Servers over Oracle Exadata solutions?

- A. Support for Flash Drives
- B. Ability to add cores and memory

- C. Offers a greater quantity of cores for enhanced scaling
- D. Can run Oracle 12C natively

Answer: B

NO.6 A customer has used Trial Capacity on Demand on their Power System E980 for two months to test the effect of activating two additional cores and 32GB of additional memory for their SAP LPAR. Being satisfied with the test result, they bought a permanent activation of the two cores and 32GB memory.

They now want to do another short test that requires the activation of one additional core.

Which option provides the most cost-effective solution?

- A. Use Mobile Activation.
- B. Use Static Activation.
- C. Use Trial Capacity on Demand again.
- D. Use Utility Capacity on Demand.

Answer: D

NO.7 An AIX customer is purchasing two new POWER9 processor-based servers: each connected to its own DS8880 at different sites. The customer wants high availability with the least amount of downtime.

Which solution will satisfy the customer's requirements?

- A. Combine PowerHA with DS8880 data replication capabilities for automated failover across the sites.
- B. Create dual VIOS on each POWER9 and double the total number of adapters in each machine.
- C. Use the DS8880 data replication capabilities to replicate the data across the sites. Configure PowerVM Live Partition Mobility for application availability.
- D. Use the DS8880 data replication capabilities to perform automated node failover across the sites.

Answer: B

NO.8 A customer has four AIX VMs, each running a different application that needs simultaneous read/write access to the same files.

Which of the following products should be recommended?

- A. PowerHA Enterprise Edition
- B. Spectrum Protect
- C. PowerHA Standard Edition
- D. Spectrum Scale

Answer: A

NO.9 Which of the following is a benefit of the POWER9 processor with Power Enterprise Servers when compared to x86?

- A. NVIDIA Tesla V100
- B. More threads per core
- C. More cores per socket
- D. DDR4 Memory

Answer: C

NO.10 An installation engineer has configured a new POWER9 processor-based server with two VIOS partitions. The client is questioning the use of resources for two VIOS partitions instead of one. What benefit does the dual VIOS configuration provide?

- A. Provides better Reliability, Availability and Serviceability (RAS).
- B. Provides for better system performance and balance between client partitions.
- C. Allows for dedicated I/O adapters.
- D. Allows for upgrading the OS on partitions without application downtime.

Answer: B

NO.11 A customer's Disaster Recovery plan requires daily backup tapes from their POWER9 processor-based server to be sent off-site. The POWER9 processor-based server is attached to an IBM Tape Library with LTO-7 tape drives and Storwize V7000 storage devices. The customer is concerned about the liability of sending sensitive data off premises.

Which of the following solutions will satisfy the customer's concerns?

- A. Enable the optional Storwize encryption feature.
- B. Purchase an IBM Cryptographic Co-Processor.
- C. Purchase IBM Multi-Cloud Data Encryption.
- D. Purchase the LTO Tape Encryption feature and Security Key Lifecycle Manager (SKLM)

Answer: A

NO.12 Where should adapter configurations be validated before adding or rearranging adapters on a Power Enterprise Server?

- A. System Rack Configuration
- B. System SSIC
- C. System Planning Tool
- D. System HMC

Answer: C
